SCORE **3.0** Basic Understanding

NC.8.G.9 Find the volume of a cylinder.

• I can use $V = \pi r^2 h$ to find the volume of a cylinder.

Match each vocabulary term to its definition, then find each volume.

A ▾ radius ✓	A. The distance from the center of a circle to its edge.
D ▾ diameter ✓	B. The amount of space a solid figure holds.
C ▾ cylinder ✓	C. A solid with two parallel circular bases.
E ▾ cone ✓	D. The distance across a circle through its center.
F ▾ sphere ✓	E. A solid with one circular base that narrows to a point.
B ▾ volume ✓	F. A perfectly round solid, like a ball.
