

Unit 4 Homework — Angle Relationships

Complete independently · Complementary/Supplementary · Vertical · Parallel Lines · Triangles

A. Complementary, Supplementary & Linear Pair

Problem 1

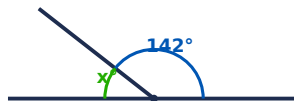

The two angles shown are complementary. Find x .

33

Problem 2

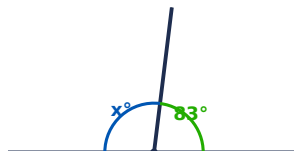

The two angles shown are supplementary. Find x .

38

Problem 3

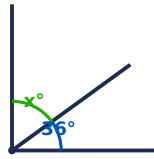

These two angles form a linear pair. Find x .

97

Problem 4

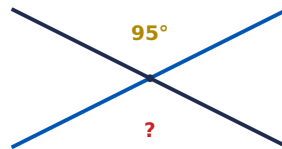

The two angles shown are complementary. Find x .

54

B. Vertical Angles**Problem 1**

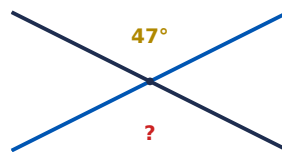

The lines shown cross at a point. Find x (vertical angles).

95

Problem 2

The lines shown cross at a point. Find x (vertical angles).

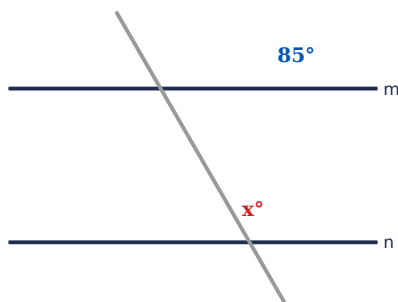

47

C. Parallel Lines & Transversals

Problem 1

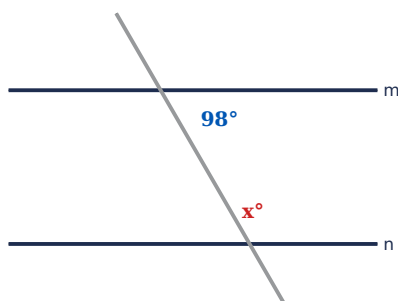

Lines m and n are parallel. The marked angles are corresponding angles. Find x .

85

Problem 2

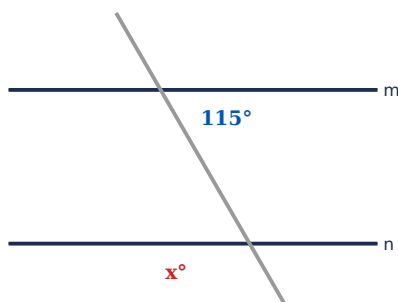

Lines m and n are parallel. The marked angles are alternate interior angles. Find x .

98

Problem 3

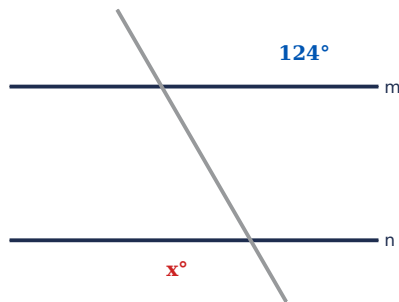

Lines m and n are parallel. The marked angles are same-side (co-interior) angles. Find x .

65

Problem 4

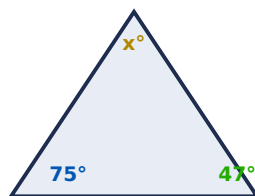

Lines m and n are parallel. The marked angles are alternate exterior angles. Find x .

124

D. Triangle Angle Sum & Exterior Angle Theorem**Problem 1**

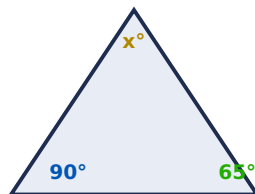

Find x in the triangle shown.

58

Problem 2

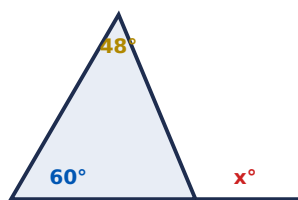

Find x in the triangle shown.

25

Problem 3

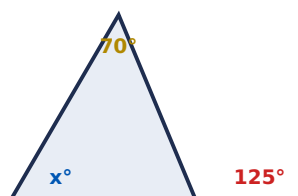

The exterior angle theorem: find x (the exterior angle).

108

Problem 4

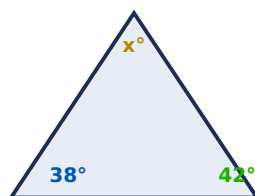

The exterior angle is 125° . One remote interior angle is 70° . Find x .

55

Problem 5

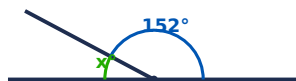

Find x in the triangle shown.

100

Problem 1

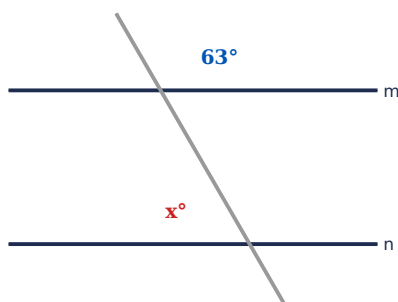

The two angles shown are supplementary. Find x .

28

Problem 2

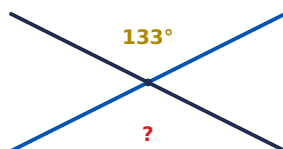

Lines m and n are parallel. The marked angles are corresponding angles. Find x .

63

Problem 3

The lines shown cross at a point. Find x (vertical angles).
