Name _____ Date _____ Block _____

Remember: 9's rule: the repeating digits go on top; one 9 for each repeating digit on the bottom. $0.\overline{27} = \frac{27}{99} = \frac{3}{11}$. **Estimate a root:** trap it between perfect squares. $36 < 40 < 49$, so $\sqrt{40}$ is between 6 and 7. **4-step algorithm:** $\sqrt{40} \approx 6 + \frac{40 - 36}{49 - 36} = 6 + \frac{4}{13} \approx 6.3$
