Name _____ Date _____ Block _____

Remember: Complementary = 90° · supplementary / straight line = 180° · around a point = 360° · vertical angles equal. $m \parallel n$: corresponding, alt. interior, alt. exterior are equal; same-side interior add to 180°. Triangle: angles add to 180°; exterior = sum of remote angles; AA → similar.

ANDRE'S WORK

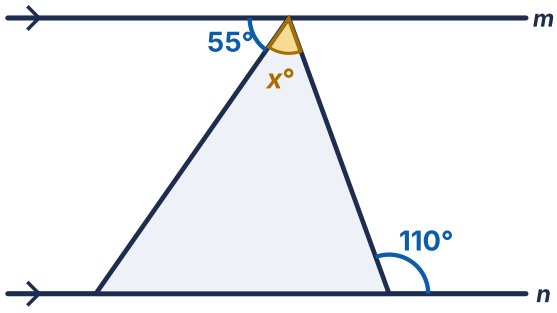

Triangle 1: 40° and 70°. Triangle 2: 70° and 70°.
Triangle 2 has no 40° angle,
so they are not similar.
