HOMEWORK 6.1 · UNIT 6 · NC.8.F.1 · NC.8.EE.7

Functions (Intro)

Targets: F.1-2, F.1-4, F.1-1, F.1-5, EE.7-3, F.1-8

Name _____ Date _____ Block _____

Remember: A **function** gives each input (x) **exactly one** output (y). Look for a repeated input: same x with **different** y's → **NOT** a function. Ex: {(1, 4), (2, 4), (3, 6)} **is** a function (outputs may repeat). {(1, 4), (1, 6)} is **not**: 1 goes to 4 and to 6.

SCORE 3.0 Approaching · the basics

Targets: F.1-2, F.1-4, F.1-1

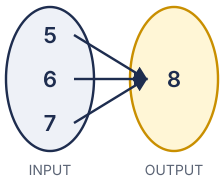

1 Is the table a function? F.1-2

x	0	1	1	2
y	3	4	6	8

Function Not a function

Why? _____

2 Is the mapping diagram a function? F.1-2

Function Not a function

Why? _____

3 Which set is **NOT** a function? F.1-2

(A) {(1, 2), (2, 4), (3, 6)}
(B) {(4, 1), (5, 1), (6, 1)}
(C) {(2, 3), (4, 5), (2, 7)}
(D) {(−1, 0), (0, −1), (1, 0)}

4 List the inputs and the outputs. F.1-4

$\{(-2, 4), (-1, 1), (0, 0), (1, 1), (2, 4)\}$

_____

_____

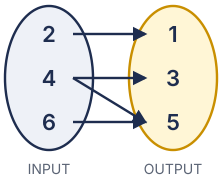

5 If one input has two different outputs, the relation is **NOT** a function. F.1-1

True False

SCORE 4.0 Proficient · on target

Targets: F.1-5, EE.7-3

6 **Leo** made a mistake. Circle it. Explain it. Fix it. F.1-5

LEO'S WORK

It **is** a function

because every output gets an arrow.

7 Find a value of k that makes this **NOT** a function. F.1-5

$\{(3, 2), (6, 5), (k, 9)\}$

Hint: Make an input repeat.

8 Solve: $3x - 7 = 20$ REVIEW 3.2 EE.7-3

Ⓐ $x = 9$ Ⓑ $x = 27$ Ⓒ $x = \frac{13}{3}$ Ⓓ $x = 81$

SCORE 5.0 Mastery · go deeper

Targets: F.1-8

9 Each student (input) is paired with their locker number (output). Two students share each locker. Is student → locker a function? Is locker → students a function? F.1-8

Student → locker is _____ because _____. Locker → students is _____ because _____.

10 Write a set of 4 ordered pairs that is **NOT** a function. Explain how you know. F.1-8

My set: _____. It is not a function because _____.
