Unit 5 Homework — Pythagorean Theorem

Complete independently · Hypotenuse · Missing Leg · Converse · Word Problems · Coordinate Distance

A. Find the Hypotenuse

Problem 1

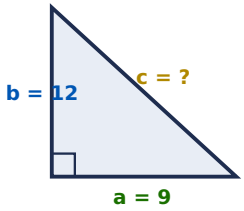

Find the hypotenuse (c) of the right triangle shown.

answer

Problem 2

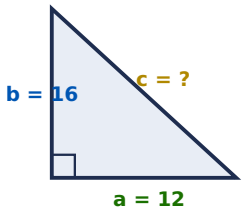

Find the hypotenuse (c) of the right triangle shown.

answer

Problem 3

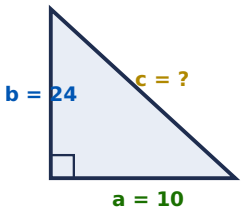

Find the hypotenuse (c) of the right triangle shown.

answer

Problem 4

Find the hypotenuse (c) of the right triangle shown.

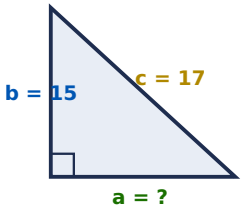

answer

B. Find a Missing Leg

Problem 1

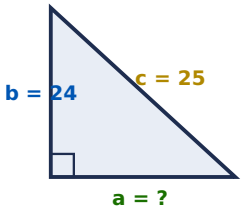

Find the missing leg (a) of the right triangle shown.

answer

Problem 2

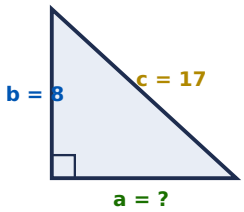

Find the missing leg (a) of the right triangle shown.

answer

Problem 3

Find the missing leg (a) of the right triangle shown.

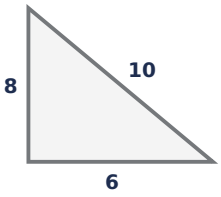

answer

C. Converse — Is It a Right Triangle?

Problem 1

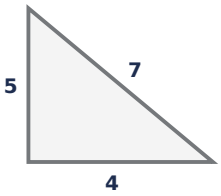

The triangle shown has sides 6, 8, 10. Is it a right triangle?

answer

Problem 2

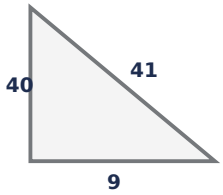

The triangle shown has sides 4, 5, 7. Is it a right triangle?

answer

Problem 3

The triangle shown has sides 9, 40, 41. Is it a right triangle?

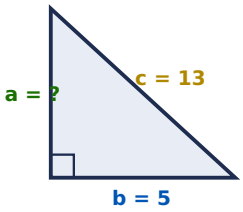

answer

D. Word Problems

Problem 1

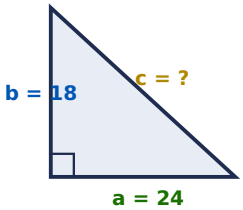

A 13-foot ladder leans against a wall. The base is 5 feet from the wall. How high up the wall does the ladder reach?

answer

Problem 2

A TV screen is 24 inches wide and 18 inches tall. What is the diagonal length?

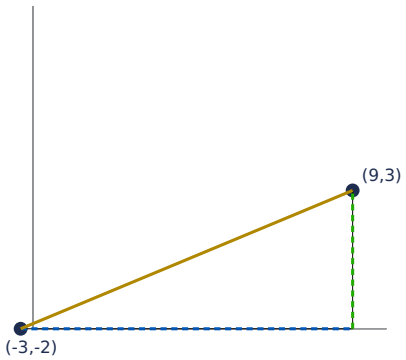

answer

E. Distance on the Coordinate Plane

Problem 1

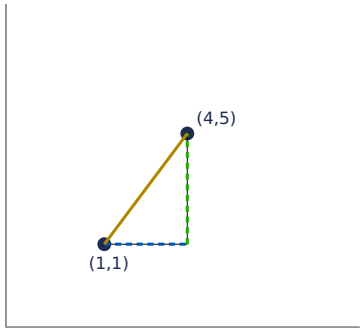

Find the distance between the two points shown.

answer

Problem 2

Find the distance between the two points shown.

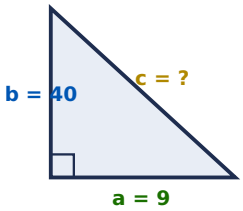

answer

F. Mixed Review

Problem 1

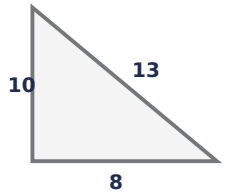

Find the hypotenuse (c) of the right triangle shown.

answer

Problem 2

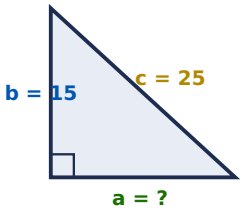

The triangle shown has sides 8, 10, 13. Is it a right triangle?

answer

Problem 3

Find the missing leg (a) of the right triangle shown.

answer
