Remember: Slope from a table: $m = \frac{\text{change in } y}{\text{change in } x}$. ***b*** = the value of y when $x = 0$. Ex: x: 0, 1, 2 and y: 5, 8, 11. Each time x goes up 1, y goes up 3. So $m = 3$, $b = 5$, and $y = 3x + 5$. If the table skips $x = 0$, work backward to find b.
