HOMEWORK 6.9 · UNIT 6 · NC.8.F.2 · NC.8.F.4 · NC.8.F.3

Linear Functions from Tables Day 2

Feb 16 / Feb 17 · Targets: F.2-3, F.4-4, F.3-3, F.2-4, F.3-4, F.2-7, F.2-8

Name _____ Date _____ Block _____

Remember: To **compare** two functions, find each one's **rate of change** (slope) and **initial value** (y-intercept). A greater rate means y grows faster. A slope farther from 0 is steeper. Ex: A is $y = 2x + 5$. B has x: 0, 1, 2 and y: 1, 4, 7. B grows faster (3 > 2). A starts higher (5 > 1).

SCORE 3.0 Approaching · the basics

Targets: F.2-3, F.4-4, F.3-3

1 Function A is $y = 5x + 2$. Function B is the table. Which has the **greater rate of change**? F.2-3

Function B

x	0	1	2
y	1	7	13

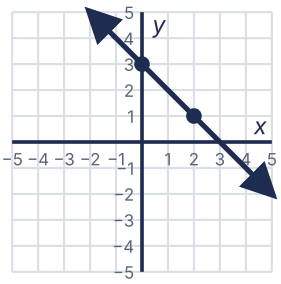

(A) Function A
(B) Function B
(C) They are the same.

2 Look at the functions in #1. Which has the **greater initial value**? F.2-3

(A) Function A
(B) Function B
(C) They are the same.

3 Function A is the graph. Function B is $y = -3x + 1$. Which line is **steeper**? Why? F.2-3

Function A

_____

_____

4 Write the equation for the table. REVIEW 6.8 F.4-4

x	0	1	2	3
y	9	7	5	3

_____

5 In $y = 7 - 2x$, the slope is 7. REVIEW 6.6 F.3-3

True False

SCORE 4.0 Proficient · on target Targets: F.2-4, F.3-4

6 Pool A's depth is $d = 3h + 10$ inches after h hours. Pool B is in the table. Which is true? F.2-4

Hours	0	1	2	3
Pool B (in.)	2	6	10	14

(A) Pool B fills faster. Pool A started with more water.
(B) Pool A fills faster. Pool A started with more water.
(C) Pool B fills faster. Pool B started with more water.
(D) They fill at the same rate.

7 Plan A passes through (0, 10) and (2, 30). Plan B is $y = 8x + 20$. Find **Gia**'s mistake. Fix it. F.2-4

GIA'S WORK
A's rate = 30 ÷ 2 = 15
15 > 8, so A grows faster.

8 Which points are on the line $y = -2x + 5$? REVIEW 6.7 F.3-4

☐ (0, 5) ☐ (1, 3) ☐ (2, 1) ☐ (3, −2)
☐ (−1, 7)
Select all that apply.

SCORE 5.0 Mastery · go deeper Targets: F.2-7, F.2-8

9 Car rental A costs $y = 25x + 50$ for x days. Rental B is in the table. Which costs less for 8 days? Explain with evidence. F.2-7

Days	0	1	2	3
Rental B ($)	80	100	120	140

A costs _____ . B costs _____ . So _____ because _____ .

10 Ty's water bottle has $y = -4x + 32$ ounces left after x hours of a hike. What does the point (8, 0) mean? Why does x = 10 not make sense? F.2-8

(8, 0) means _____ . x = 10 does not make sense because _____ .
